Practical Chiropody— E. G. V. Runting	6	25

"METZ MADE MEDICINALS"

Parathesin: Topically

Novocain-Suprarenin Solutions: hypodermatically.

For information as to their helpful uses in podiatry practice, send for printed matter to

H. A. METZ LABORATORIES, INC.
111 HUDSON ST. N.Y. CITY

whether or not I have let myself in for something that may or may not be too big a job for me, but with the help of the Vice-Presidents, the Council and my friends, I hope to be able to carry on and try at least to equal the success of my predecessors.

I just want to say in closing that I would be ungrateful if I did not say to you that I appreciate the confidence you have placed in me by electing me to this office. I can realize no greater honor that can come to any of us than to be elected President of this body and I thank you.

[They all arose and applauded].

MR. HEDRICK: I move that we adjourn.

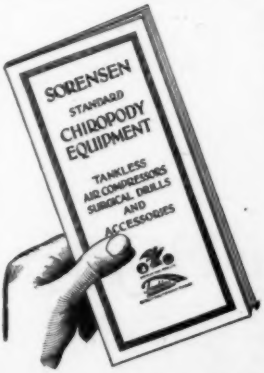
[The motion was seconded by Mr. Weiss and unanimously carried].

[The meeting adjourned at twelve-thirty o'clock].

[ADJOURNMENT].

(This concludes the proceedings of the House of Delegates at the Cleveland Convention. That body accomplished more business in a shorter space of time than any previous House.—EDITOR.)

Doctor: You NEED this Literature!



You need it because therein you will find everything from the smallest bur to adjustable lamps, surgical drills, chairs, foot and knee bakers, cabinets, combination outfits, etc., etc.

And all of the unsurpassed quality for which the name Sorensen has stood these many years.

Simply ask for "Literature Y," and we'll send it at once by first-class mail.

"FOOT ORTHOPAEDICS"

OWING to the need to add several chapters to the original outline of "Foot Orthopaedics," the completed volume will not be sent to subscribers until the last week in December. The delays in producing this work have been vexatious and annoying, but the value of the book is being increasingly enhanced and this circumstance should mitigate any disappointment which has arisen because of the tardiness in issuing it. "Foot Orthopaedics" will be the most complete and scientific work on the subject ever published, and podiatrists will find it a mine of knowledge, whose practical features will make the consultation of its pages not only agreeable but profitable.

FOOT ORTHOPAEDICS

217 WEST 125TH STREET NEW YORK CITY

OUR CORRESPONDENCE

(Continued from Page 28.)

a good shoe. She does. She gets a good (looking) shoe, and wonders why the pain does not stop.

This is why I think it is better for the chiropodist to specify very carefully the kind of shoe he wants the patient to have. Then he should require the patient to bring the shoe to him for verification.

But, first, as you say, the chiropodist should know shoes himself.

Sincerely,
(Signed)
A. OWEN PENNEY.
